Kaunas, Lithuania

## SUMMARY

I am responsible, diligent, attentive and have good interpersonal skills. I am used to an agile work environment and can quickly adapt to changing business requirements.

Over the past 5 years, I had an opportunity to work with culturally diverse teams, where I was focusing on ensuring a high level of quality in the work my team was doing.

Currently, I'm studying a lot to become a software QA engineer. I would love to join a software company where I could create value by contributing to the quality assurance of interesting software products while also gaining more practical experience.

## EXPERIENCE

### Quality Improvement Specialist

03/2016 - 02/2020

R1 RCM

- Ensured the high-quality work of my team specialists.
- Improved several processes with macro commands to work processes in a more effective way and to avoid repetitive errors.
- Initiated additional projects with other teams, which helped to generate more income for the company.
- Investigated many trends and issues related to rejected claims, in order to resolve it faster and prevent more rejections.

### Account Resolution Specialist

05/2015 - 03/2016

Intermedix

- Identified reasons for denied insurance claims and effectively resolved them by determining a course of action in the revenue cycle management system.
- Maintained high productivity and work quality results.
- Worked on various projects, collaborated with team members to reach the team goals.
